Narges Abbasi

Front-end Developer

About Me

Dynamic Front-End Developer with over 9 years of experience in building responsive and user-friendly web applications. Proficient in HTML, CSS, JavaScript, and modern libraries like React, as well as frameworks like Node.js. Committed to delivering high-quality digital experiences that enhance user engagement.

Experience

May 2024 - Current
Front-End Developer
Self-employed (Remote)

- Independently designed and developed responsive websites using React, Redux for state management, Next JS,SSR and Typescript
- Built user-friendly interfaces focused on performance, accessibility, and clean UI/UX
- Gained hands-on experience managing the full development cycle, from planning to deployment.
- **Two Deployed Projects samples**:
- Shopify project(React,Typescript,Tailwind)
  - Git Hub: https://github.com/narsis-ivy-abbasi/shopify
  - Deploy on Netlify: https://ivyshopify.netlify.app/
- Trip Project(Next,Typescript)
  - GitHub: https://github.com/narsis-ivy-abbasi/trip-reservation
  - Deploy on Netlify: https://the-trip-reservation.netlify.app/

Aug 2018 - Jul 2024
Front-End Developer
Soubar engineering Company

- Played a key role in front-end development within a 5 member team, delivering a stable product over 5 years with a 95% quality rating.
- Built responsive, accessible UIs using HTML5, CSS3, Bootstrap, React, and TypeScript, improving development efficiency by 20%.
- Collaborated on UX/UI design and code reviews, enhancing user experience by 30% and ensuring best practice adherence.

Jun 2017 – Feb 2018
Junior Front-End Developer
Dotin Core Banking Co

- Contributed to the development of a core banking application using Spring Framework and Hibernate, improving performance and streamlining data management.
- Designed and implemented key features such as CRUD operations and bill registration tasks, enhancing operational workflows.
- Collaborated in a 14 member Agile team using Jira, ensuring efficient project delivery through strong cross-functional coordination.

Apr 2014 – Jul 2016
Developer
Middle East Bank

- Developed and maintained over 350 PL/SQL code blocks, procedures, and triggers to enhance banking systems and ensure efficient data processing.
- Improved application reliability and integration by debugging Java programs and implementing XML-based data communication interfaces.
- Conducted end-to-end testing, UI enhancements, and bug resolution using tools like Firebug, delivering high-quality, stable banking applications.

Jan 2009 – Mar 2013
Full stack Developer
Soubar engineering Company

- Developed and deployed desktop applications with a focus on operational efficiency and enhanced user experience using JavaScript and UI/UX best practices.
- Designed and implemented a remote printer control app, improving accessibility and functionality through intuitive interfaces and clean UI design.
- Applied software testing principles and technical writing to reduce bugs by 30% and improve delivery timelines, contributing to overall project success.
